

If a path doesn't exist,
create your own.

What impact will you make?
www.deloitte.at/karriere

Part Business.

Part Creative.

Part Technology.

One hundred percent digital.

We are pioneering a new model for a new digital world. Deloitte Digital is a unique combination of a digital agency and a consultancy under one, integrated, global practice. We are defining the digital landscape.

To enforce our team we are searching for a

Database Engineer (m/w)

Your challenges

- Work collaboratively with developers inside and outside of the team
- Research, test and contribute in the adoption of new technologies and approaches that improve database performance and stability
- Develop database architectures to address business requirements, ensuring system scalability, security, performance and reliability
- Design database applications such as interfaces, data transfer mechanisms and data partitions to enable efficient access of the generic database structure
- Identify data sources, construct data decomposition diagrams, provide data flow diagrams and document the process
- Help deliver features end to end. We don't throw our work "over the wall," everyone is expected to pull together to design new features and figure out bugs

Your Profile

Are you addicted to the thrill of programming? You're innovative, quick-thinking and eager to learn more? Does curiosity feed your soul? Great! Then you could be the one that we are looking for.

In hard facts, what you should bring with you:

- Deep knowledge of...
 - ... structured database technologies, e.g. MSSQL, Oracle, Postgres, MySQL
 - ... at least one or more SQL dialects, e.g. TSQL, PSQL, MySQL
 - ... database optimization techniques
 - ... JPA, SQL
 - ... Windows server administration
 - ... Git
- Knowledge of...
 - ... NoSQL database technologies, e.g. MongoDB, Cassandra, ElasticSearch
 - ... partitioning and replication strategies
 - ... database schema organization and management techniques
 - ... REST, HTTP, Microservices principles
 - ... Java, .Net and PHP platforms
 - ... Docker, Maven, Apache Kafka
 - ... Python and bash scripting

Your Benefits

- Work hand-in-hand with our high-class international clients to apply the right solution
- Work alongside recognized experts and well educated team players
- Principle of flat hierarchy and open door policy
- We value difference in our multicultural teams
- We boost and steer your career and knowledge with various advanced trainings
- We have flexible working arrangements
- Benefit from the support of a global organization and network

Annual gross salary from € 46.200,- depending on your academic background and professional experience. We offer competitive pay and a wide range of benefits.

We are looking forward to your online application:
